LPCC Feature Company: University of Nebraska Mail and Distribution Services

The University of Nebraska Mail and Distribution Services plays an important role in the school's day-to-day operations. The unit is committed to excellence and dedicated to service when it comes to mail at the University. Ken Reining leads a staff of 12 that handles mail for over 300 departments in 100 buildings on the University's city and east campuses.

Mail and Distribution Services utilizes the United States Postal Service to process over 1.2 million pieces of mail annually. First Class Presort, Presort Standard and Non-Profit rates are used to maximize savings for their departments. They also receive 1.5 million pieces of mail that must be sorted and delivered internally. The goal of the department is to process and deliver all incoming and outgoing mail in the same business day.

Mail list management plays a major role to the University. Mail and Distribution Services processes over 800 lists annually to meet USPS standards for automated discounts. It also addresses and mails many of the lists it certifies. A complete mail and distribution department makes UNL Mail and Distribution Services a vital part of the University's functions.

Move-Update FAQ's

How does Move/Update apply when mailing to a newly acquired address?

When a customer initiates contact that results in an addition to the list, the newly added address can "ride" with the list until the next cycle for update. This will only occur when the person for whom the mail piece is prepared has asked to be added to the list by requesting services, literature, merchandise, etc. We anticipate the new names will not exceed one percent of the list total.

If the address is derived from any other source, the address must be mailed at single-piece rates until the next update cycle or new update documentation must accompany the mailing.

Does a list or name have to be updated with Move/Update literally every 180 days?

A list or name can be updated anytime, if it is updated within 185 days of its use for a First-Class discounted mailing. For example, if the mailer mails to a list once every two years, that list would not need to be processed every six months. But it would need to be processed within 185 days prior to the date of mailing.

Must First-Class Mail items be used to obtain Move/Update information?

No. Updating may be performed by any approved method appropriate for the class of the mail piece. A valid update can be obtained regardless of the class of the mail piece used for that purpose. The following are approved methods:

ACSTMSM Service, Ancillary Service Endorsements, FASTSMforwardSM System and NCOALinkSM Systems.

To determine the right choice for your mailings, please contact your local USPS representative.
